---

Explo Systems, Minden, LA -- Participated in meetings with the state and federal parties involved with the response to the Site. The Army was defensive and the State was guarded. The State will pursue an exemption which would allow the Army to store the propellant at their facilities.

Monolyte Laboratories, Slaughter, LA -- Made an initial site visit. In November, a fire destroyed the lab and the owners have been attempting a cleanup since. However, the owners have stopped payment to the response company. It is anticipated that the State will ask for assistance from EPA.

Bayou Corne, Assumption Parish, LA -- A brief update on the activities from LDEQ: The containment berm is planned to be installed, keeping salt water from entering the swamp. Some in home air monitoring has been installed but Texas Brine hasn't received many access agreements. A new crack is visible on the Texas Brine facility.

Scrub-A-Dubb, Lubbock, TX -- Email conversation with the environmental staff in Lubbock. Somebody is seeking to connect water and sewer to the 3+ acre property that was subject to a response action. EPA has no objections and sees no problems with the connection.

Readiness Training -- Coordinating with session chairs, OAM, and other presenters and teachers for the March training.
